Population of Municipality of Nabas reaches 31, 052 mark

(Results from 2010 Census of Population and Housing)

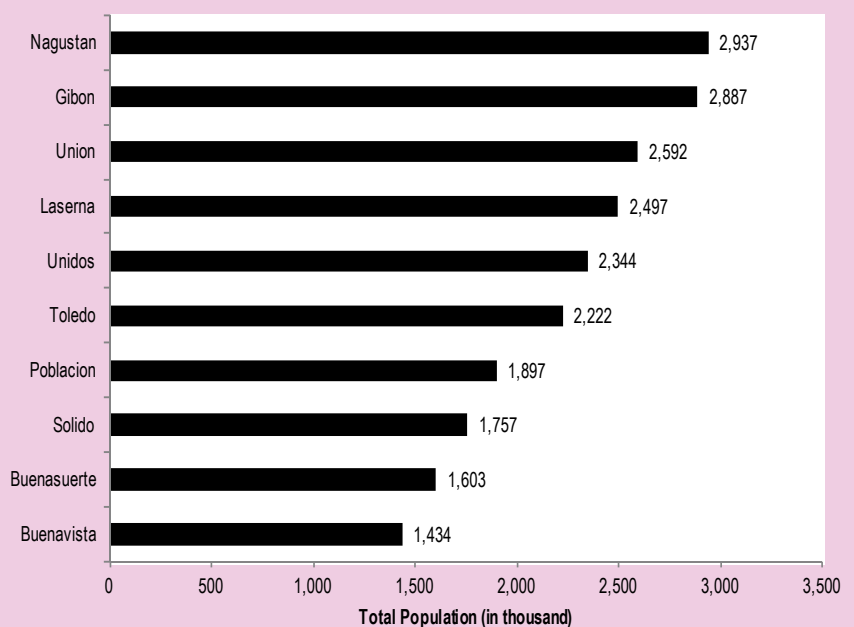

The population of Nabas up by more than six thousand

The Municipality of Nabas posted a total population of 31, 052 persons as of May 2010 Census of Population and Housing. The population size increased by 6, 038 persons over its 2000 population count of 25, 014. The increase in population count from 2000 to 2010 translated to an average annual population growth rate (PGR) of 2.19 percent.

Barangay Nagustan has the largest number of population

Among the twenty (20) barangays comprising the Municipality of Nabas, Barangay Nagustan was the most populous with a size making up 9.5 percent of the total municipal population. Barangay Gibon was the second with 9.3 percent share, followed by Union with 8.3, Laserna with 8.0, and Unidos with 7.5 percent. The rest of the barangays contributed 7.2 percent and below. The least populated area was Barangay Pawa with 0.7 percent share of the total population of the municipality.

Figure 1. Top Ten Barangays: Nabas, 2010

Union was the fastest growing barangay in population size

Among the 20 barangays, Union was the fastest growing barangay having a population growth rate of 5.49 percent. This growth is more than twice the rate of the municipal level (2.19 percent) and more than thrice the rate of the provincial level (1.73 percent). Following

Union is Brgy. Tagaroroc with 3.41 percent, Habana with 3.37 percent, Rizal with 2.93, and Alimbo-Baybay with 2.64 percent.

On the other hand, of the total barangays, only Brgy. Pawa (-2.02) showed negative growth

rate during the period 2000 to 2010.

Other barangays that exceeded municipal growth rate are: Nagustan (2.60), Buenafortuna (2.58), and Solido (2.55).

Table 1

Household Population, Number of Households, and Average Household Size Municipality of Nabas, 2010 and 2000

Census Year	Household Population	Number of Households	Average Household Size
2010	31, 051	6, 376	4.9
2000	24, 958	4, 691	5.3

Average household size stands at 4.9 persons

The number of households in 2010 was recorded 6, 376 higher by 1, 685

The average household size of Nabas in 2010 is 4.9 persons, lower than that in 2000 which is 5.3 persons.

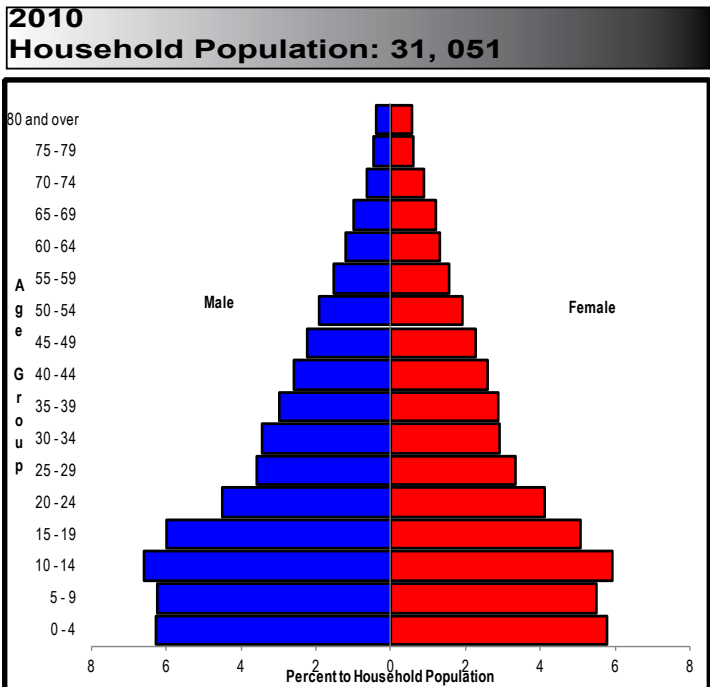

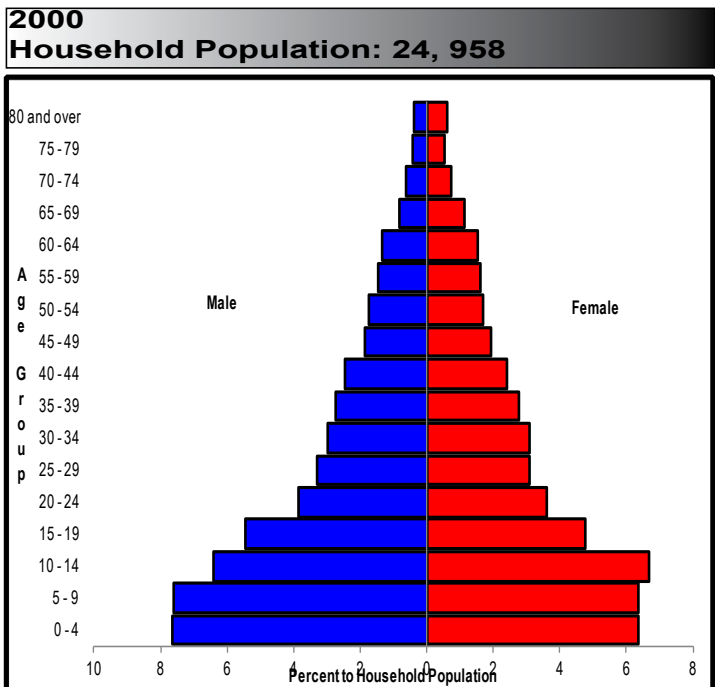

Figure 2. Age-Sex Pyramid of Household Population: Nabas

Children aged 10 to 14 years comprised the biggest group of Nabas' populace

As of 2010, children aged 10 to 14 dominated the municipality with 12.51 percent share of the total household population. This was followed by 0 to 4 years old with 12.06 percent, and 5 to 9 years old with 11.73 percent. This made the age structure of the household population of Nabas to deviate from the usual pyramid shape, as population decreases so age increases.

Of the 31, 051 household population in 2010, there were about 11, 269 or 36.3 percent under 15 years of age. Children

below 5 years old comprised 12.1 percent of the household population in the municipality. Children aged 5 to 9 years accounted for 11.7 percent while those aged 10 to 14 years comprised 12.5 percent.

In terms of the distribution by age and sex, males outnumbered females in age groups 0 to 44 years old, while females dominated males in the age group 45 years old and over.

sex ratio of 104 males per 100 females.

Sex ratio was 106 males per 100 females

Of the 31, 051 household population in 2010, males accounted 51.5 percent while females comprised 48.5 percent. These figures resulted in a sex ratio of 106 males for every 100 females. In 2000, male population outnumbered thier female counterparts with

Children under 15 years old had a sex ratio of 111 males for every 100 females, while for those aged 15 to 64 years had a sex ratio of 107 males for every 100 females. However, the sex ratio for the age group 65 years old and over was 76 males per 100 females, showing a higher mortality of males than females in this age group.

Median age increases to 21 years

In 2010, the median age of Nabas population was 21 years, which means that half of the household population was younger than 21 years. This further shows that Nabas has predominantly young population. The 2010 median age is higher than the median age of 19 years recorded in 2000. The municipality's median age for males in 2010 is 20 years, while that for females is 21 years.

Sex Ratio

All ages	106:100
0-14	111:100
15-64	107:100
65 & up	76:100

Nabas school age population accounted 43.9 percent

In 2010, the school-age population (5 to 24 years old) in Nabas comprised of 43.9 percent of the 31, 051 household population. By comparison, the school-age population in 2000 was 44.7 percent of the 24, 958 household population. Of the population who were of school age, the males made up 53.0 percent, while females comprised 47.0 percent.

School-Age Population	
Total	13, 633
Males	7, 230
Females	6, 403

Dependency ratio of Nabas was 72

The overall dependency ratio of Nabas was 72, which indicates that for every 100 working-age population, there were about 72 dependents. This is lower than the dependency ratio in 2000 recorded at 86 dependents per 100 working-age population.

Senior citizens in Nabas comprise 8.2 percent

In Nabas, senior citizen comprised 8.2 percent of the total household population in 2010, which is slightly higher than the 8.1 percent recorded in year 2000. Among the senior citizens, females outnumbered the males with 55.6 percent and 44.4 percent, respectively.

Voting age population constitutes 56.7 percent

The voting-age population (18 years old and over) accounted for 56.7 percent of the entire household population in the municipality. Of the voting-age population, 50.5 percent were males and 49.5 percent were females.

Voting-Age Population

TOTAL	17,611
Male	8,891
Female	8,720

Ageing index in Nabas recorded at 15.7 percent

In Nabas, the ageing index or the proportion of persons aged 60 years and over per 100 persons under the age of 15 years was computed at 15.7 percent in 2010. This means that there are 16 persons aged 60 years and over for every 100 children under 15 years old. In 2000, the ageing index is lower computed at 12.9 percent.

TECHNICAL NOTES

Growth rate – the amount of increase that a specific variable has gained within a specific period and context

Total population – all usual residents of the country or all person present in the country at the time of census.

Household – is a social unit consisting of a person or a group of persons who sleep in the same housing unit and have common arrangements in the preparation and consumption of food.

Household population – refers to all persons who are members of the household.

Average household size – is the average number of persons who live in the household, computed as the household population in a given area divided by the corresponding total number of households in that area.

Median age – is the age that divides the population into two numerically equal groups, that is, half of the population are younger than this age and the other half are older.

Sex ratio – is the number of males per one hundred females in a given population.

Overall dependency ratio – is the number of persons under 15 years old (young dependents) and persons aged 65 and older (old dependents) per one hundred persons 15 to 64 years old (working-age group).

Ageing index – is calculated as the number of persons 60 years old and over per one hundred person under the age of 15 years.

The 2010 Census of Population and Housing (2010 CPH) was undertaken by the Philippine Statistics Authority (formerly National Statistics Office) in May-June 2010 pursuant to Batas Pambansa Blg. 72 and Commonwealth Act 591. The 2010 CPH was designed to take an inventory of the population and housing units in the Philippines nationwide and to collect information about their characteristics. Information on the count of the population and living quarters were collected with 12:01 a.m. of May 1, 2010 as the census reference time and date.

The population counts proclaimed by the President as official for all purposes were based on census questionnaires accomplished by the enumerators all over the country. Questionnaires were processed in Census Processing Centers using the Optimal Mark Recognition (OMR) technology along with the Census Integrated Processing System developed by NSO.
